

# Noam Raby

A full-stack developer with 5 years of experience in building SaaS and web applications. Began my career in post-production and evolved towards product development with expertise in creating visual experiences.

## Work Experience

### **SundaySky - Software Developer**

**01.2018 - present**

Worked on SundaySky's cloud-based SaaS offering. Owned features end to end - taking part in story breakdown, design, implementation, testing, and monitoring

Built a project planning web app using Typescript, React, GraphQL, PostgreSQL and custom graph traversal logic

Rebuilt Adobe After extension from architecture to release using TypeScript, React, CSS, webpack, REST & GraphQL APIs, Jest, and GitHub Actions

Led the After Effects domain in the group, contact point for customers and keeping the team up to date

Collaborated with UI/UX designers to build a component library using StoryBook

Facilitated workshops on advanced CSS for front end developers and basic web development for non-engineers

### **SundaySky - QA Engineer**

**08.2016-12.2017**

Wrote a Python and FFmpeg framework that compares videos generated by nightly build to videos in production

Eliminated failures in demo page by writing a Python script that detects configurations failures, alerts support and professional services via PagerDuty

### **Magisto (Now Vimeo) - Editing Logics**

**02.2015-08.2016**

Editing Logic's role was to bridge Creative team's vision and Magisto's storytelling engine. Created dozens of Editing Styles  
Tech: Python, Splunk and huge JSON files

### **Gravity VFX - IT & Broadcast Professional**

**02.2013-01.2015**

Accelerated preview delivery to clients by writing a Python script that automatically transcodes video exports

Managed A/V equipment, Microsoft Exchange & FTP servers, Red Hat based Autodesk Flame Systems and more
